

BENSUMEC® 4LF

PRE-EMERGENT GRASS AND WEED HERBICIDE

Most economical way to manage crabgrass, *Poa annua* and goosegrass.

Bensumec™ 4LF is a pre-emergent herbicide which provides effective control of annual grasses, including crabgrass, *Poa annua* and goosegrass as well as certain broadleaf weeds in greens, tees and bentgrass fairways. Spontaneous emulsification assures complete mixing and eliminates spray-tank layering or clogging, even with limited agitation.

In many areas of the United States, Bensumec 4LF has become the product of choice for the control and management of *Poa annua*.

Because of its proven weed control, compatibility with other turf products and high turfgrass tolerance, Bensumec 4LF has

been widely trusted and accepted by golf course superintendents and landscape managers on their most valuable turf. On turf containing newer and older varieties of bentgrass, Bensumec 4LF offers excellent control where other herbicides may cause root pruning injury or discoloration.

Bensumec 4LF is labeled for use in established bentgrass, bluegrass, fescue, perennial ryegrass, bermudagrass, zoysiagrass, bahiagrass, centipedegrass and St. Augustinegrass. Bensumec 4LF has a high degree of turfgrass tolerance.

Bensumec is a trademark of
PBI/GORDON CORPORATION

- Controls annual bluegrass (*Poa annua*), crabgrass, goosegrass and many other weeds in turf
- Doesn't cause root pruning
- High turfgrass tolerance
- Late fall application provides control next spring

- Free application guide available upon request
- Also available in two granular formulations, Pre-San® 7G and Pre-San® 12.5G

RECOMMENDATIONS

For pre-emergent grass and broadleaf weed control in all major turfgrass species.

ACTIVE INGREDIENT:

Bensulide: S-(O,O-diisopropyl phosphorodithioate) ester of N-(2-mercapto)benzenesulfonamide . . . 46.0%
Inert Ingredients 54.0%

EPA Reg. No. 2217-696

PACKAGING:

Plastic U.S. gallons: 4 X 1 per case:
shipping weight 38 lbs.
Plastic U.S. 2.5 gallons: 2 X 2.5 per case:
shipping weight 45 lbs.
